

Large Disease Knowledge Base for RAG

Single PDF • 142 disease/condition records • Meaning, causes, transmission, symptoms and precautions

Purpose: Educational dataset for retrieval-augmented generation. The entries are concise summaries, not individualized medical advice. WHO ICD-11 is the international classification framework; it contains diseases, disorders, injuries, signs/symptoms and related entities, and its 2026-01 release is the latest release.

Important: “All diseases in the world” cannot be represented by a finite common-language list: WHO’s ICD-11 Foundation contains a much broader universe of interconnected entities and synonyms, while the MMS linearization is a classification for reporting. This PDF therefore provides a large practical disease knowledge set rather than claiming to be the complete WHO Foundation.

1. Tuberculosis

Category	Infectious
Meaning	A bacterial infection that commonly affects the lungs.
CAUSE	Mycobacterium tuberculosis.
Transmission / Spread	Airborne.
Symptoms	Persistent cough, fever, night sweats, weight loss, weakness.
PRECAUTIONS	Good ventilation, testing after exposure, respiratory precautions when advised, and completing prescribed treatment.

2. Malaria

Category	Infectious
Meaning	A parasitic disease transmitted by infected mosquitoes.
CAUSE	Plasmodium parasites.
Transmission / Spread	Anopheles mosquito bites.
Symptoms	Fever, chills, headache; severe disease may affect the brain or organs.
PRECAUTIONS	Bed nets, repellents, protective clothing, mosquito control, and preventive medicines when indicated.

3. Dengue

Category	Infectious
Meaning	A mosquito-borne viral illness that can sometimes become severe.
CAUSE	Dengue virus.
Transmission / Spread	Aedes mosquito bites.
Symptoms	High fever, headache, eye pain, muscle/joint pain, nausea and rash.
PRECAUTIONS	Avoid mosquito bites, remove standing water, use repellent and seek urgent care for warning signs.

4. Rabies

Category	Infectious
Meaning	A viral infection of the nervous system that is almost always fatal after symptoms begin.
CAUSE	Rabies virus.
Transmission / Spread	Usually bites/scratches from infected mammals.
Symptoms	Fever, abnormal sensations, agitation, swallowing difficulty, hydrophobia and paralysis.
PRECAUTIONS	Avoid animal bites; vaccinate dogs where recommended; wash wounds immediately and obtain urgent post-exposure care.

5. Measles

Category	Infectious
Meaning	A highly contagious viral infection causing fever and rash.
CAUSE	Measles virus.
Transmission / Spread	Airborne/respiratory.
Symptoms	Fever, cough, runny nose, red eyes and widespread rash.
PRECAUTIONS	MMR/measles vaccination and avoiding exposure during outbreaks.

6. Hepatitis B

Category	Infectious
Meaning	A viral infection that can cause acute or chronic liver disease.
CAUSE	Hepatitis B virus.
Transmission / Spread	Blood/body fluids; sexual and perinatal transmission.
Symptoms	Fatigue, nausea, abdominal discomfort, dark urine, jaundice; often no symptoms.
PRECAUTIONS	Vaccination, sterile equipment, screened blood and safer sex practices.

7. Hepatitis C

Category	Infectious
Meaning	A viral liver infection that may become chronic and cause cirrhosis or cancer.
CAUSE	Hepatitis C virus.
Transmission / Spread	Mainly infected blood.
Symptoms	Often no symptoms; fatigue, nausea, abdominal pain, dark urine and jaundice may occur.
PRECAUTIONS	Sterile injection/medical equipment and screened blood; avoid sharing needles.

8. Cholera

Category	Infectious
Meaning	An acute intestinal infection causing severe watery diarrhoea and dehydration.
CAUSE	Vibrio cholerae.
Transmission / Spread	Contaminated food or water.
Symptoms	Profuse watery diarrhoea, vomiting and dehydration.
PRECAUTIONS	Safe water, sanitation, hand hygiene, food safety and outbreak vaccination where advised.

9. Typhoid Fever

Category	Infectious
Meaning	A systemic bacterial infection associated with prolonged fever and intestinal illness.
CAUSE	Salmonella Typhi.
Transmission / Spread	Contaminated food or water.
Symptoms	Prolonged fever, headache, abdominal symptoms, diarrhoea or constipation.
PRECAUTIONS	Safe water/food, handwashing, sanitation and vaccination when recommended.

10. Influenza

Category	Infectious
Meaning	A contagious respiratory illness that occurs seasonally and can cause complications.
CAUSE	Influenza viruses.
Transmission / Spread	Respiratory droplets/aerosols.
Symptoms	Fever, cough, sore throat, body aches, headache and fatigue.
PRECAUTIONS	Vaccination where recommended, ventilation, hand hygiene and staying home when sick.

11. COVID-19

Category	Infectious
Meaning	A respiratory infection caused by SARS-CoV-2 with illness ranging from mild to severe.
CAUSE	SARS-CoV-2.
Transmission / Spread	Respiratory particles.
Symptoms	Fever, cough, sore throat, fatigue, headache and sometimes breathing difficulty.
PRECAUTIONS	Recommended vaccination, ventilation, staying home when ill and appropriate masking in higher-risk settings.

12. Pneumonia

Category	Respiratory
Meaning	Infection/inflammation of lung tissue that can impair breathing.
CAUSE	Bacteria, viruses, fungi or other causes.
Transmission / Spread	Depends on cause; some pathogens spread through respiratory particles.
Symptoms	Cough, fever, chills, chest pain and difficult/rapid breathing.
PRECAUTIONS	Vaccination where indicated, hand hygiene, ventilation, avoiding tobacco smoke and managing chronic disease.

13. Meningitis

Category	Neurological/Infectious
Meaning	Inflammation of membranes around the brain and spinal cord.
CAUSE	Bacteria, viruses, fungi or parasites.
Transmission / Spread	Depends on cause; some bacterial forms spread by close respiratory contact.
Symptoms	Fever, severe headache, neck stiffness, vomiting, confusion and sometimes rash.
PRECAUTIONS	Relevant vaccination, hygiene and urgent medical assessment for suspected meningitis.

14. Polio

Category	Infectious
Meaning	A viral disease that can damage motor neurons and cause permanent paralysis.
CAUSE	Poliovirus.
Transmission / Spread	Mainly fecal-oral.
Symptoms	Often none; severe disease can cause meningitis or paralysis.
PRECAUTIONS	Vaccination, sanitation and hygiene.

15. Chickenpox

Category	Infectious
Meaning	A contagious viral infection characterized by an itchy blistering rash.
CAUSE	Varicella-zoster virus.
Transmission / Spread	Respiratory particles and blister fluid.
Symptoms	Itchy rash, fever, tiredness and headache.
PRECAUTIONS	Vaccination where recommended and avoiding vulnerable people while infectious.

16. Mumps

Category	Infectious
Meaning	A viral infection commonly causing painful swelling of salivary glands.
CAUSE	Mumps virus.
Transmission / Spread	Respiratory droplets/saliva.
Symptoms	Fever, headache, muscle aches and jaw-area swelling.
PRECAUTIONS	MMR vaccination and avoiding close contact while infectious.

17. Pertussis

Category	Infectious
Meaning	A highly contagious bacterial respiratory infection causing severe coughing fits.
CAUSE	Bordetella pertussis.
Transmission / Spread	Respiratory droplets.
Symptoms	Coughing fits, vomiting after coughing and sometimes a whoop.
PRECAUTIONS	Vaccination, maternal vaccination where recommended and early treatment to reduce spread.

18. Leprosy

Category	Infectious
Meaning	A chronic bacterial infection that mainly damages skin and peripheral nerves.
CAUSE	Mycobacterium leprae and related bacteria.
Transmission / Spread	Usually prolonged close contact/respiratory exposure; transmission is inefficient.
Symptoms	Numb skin patches, nerve thickening, weakness and sensory loss.
PRECAUTIONS	Early diagnosis and complete multidrug treatment; avoid prolonged contact with untreated cases.

19. Yellow Fever

Category	Infectious
Meaning	A mosquito-borne viral disease that can cause severe liver and bleeding complications.
CAUSE	Yellow fever virus.
Transmission / Spread	Infected mosquito bites.
Symptoms	Fever, headache, muscle aches, nausea; severe illness may cause jaundice and bleeding.
PRECAUTIONS	Vaccination when indicated and mosquito-bite prevention.

20. Japanese Encephalitis

Category	Infectious/Neurological
Meaning	A mosquito-borne viral infection that can cause inflammation of the brain.
CAUSE	Japanese encephalitis virus.
Transmission / Spread	Culex mosquito bites.
Symptoms	Often asymptomatic; severe cases cause fever, confusion, seizures and neurological problems.
PRECAUTIONS	Vaccination in risk areas, mosquito control and bite prevention.

21. Chikungunya

Category	Infectious
Meaning	A mosquito-borne viral illness notable for severe joint pain.
CAUSE	Chikungunya virus.
Transmission / Spread	Aedes mosquito bites.
Symptoms	Sudden fever, severe joint pain, rash and headache.
PRECAUTIONS	Repellent, protective clothing, screens and elimination of standing water.

22. Zika

Category	Infectious
Meaning	A usually mild mosquito-borne viral infection that can cause serious fetal complications during pregnancy.
CAUSE	Zika virus.
Transmission / Spread	Mosquitoes; also sexual and maternal-fetal transmission.
Symptoms	Rash, fever, conjunctivitis, joint pain; often mild or absent.
PRECAUTIONS	Mosquito protection and appropriate sexual/pregnancy precautions in transmission areas.

23. HIV Infection/AIDS

Category	Infectious
Meaning	A viral infection that progressively damages the immune system without effective treatment.
CAUSE	Human immunodeficiency virus.
Transmission / Spread	Blood, sexual fluids and breast milk.
Symptoms	May be asymptomatic early; later infections, weight loss, fever and other illnesses.
PRECAUTIONS	Condoms/barriers, testing, PrEP when appropriate, sterile injection equipment and effective treatment.

24. Tetanus

Category	Infectious
Meaning	A serious nervous-system disease causing painful muscle stiffness and spasms.
CAUSE	Clostridium tetani toxin.
Transmission / Spread	Bacteria enter contaminated wounds; not usually person-to-person.
Symptoms	Jaw stiffness, muscle spasms, difficulty swallowing and breathing problems.
PRECAUTIONS	Routine vaccination, wound care and appropriate booster doses.

25. Diphtheria

Category	Infectious
Meaning	A bacterial infection that can form a throat membrane and cause toxin-related complications.
CAUSE	Corynebacterium diphtheriae.
Transmission / Spread	Respiratory droplets/contact.
Symptoms	Sore throat, fever, swollen neck and gray throat membrane.
PRECAUTIONS	Routine vaccination and avoiding close contact with infected people.

26. Scarlet Fever

Category	Infectious
Meaning	A toxin-mediated illness associated with streptococcal throat infection and rash.
CAUSE	Group A Streptococcus.
Transmission / Spread	Respiratory droplets/contact.
Symptoms	Sore throat, fever and fine rough-textured rash.
PRECAUTIONS	Hand hygiene, avoiding close contact when ill and appropriate medical treatment.

27. Lyme Disease

Category	Infectious
Meaning	A bacterial infection transmitted by certain ticks.
CAUSE	Borrelia bacteria.
Transmission / Spread	Infected tick bites.
Symptoms	Expanding rash, fever, headache, fatigue and later joint/neurological symptoms.
PRECAUTIONS	Tick avoidance, protective clothing and prompt tick removal.

28. Plague

Category	Infectious
Meaning	A severe bacterial infection that can affect lymph nodes, lungs or bloodstream.
CAUSE	Yersinia pestis.
Transmission / Spread	Usually infected fleas; pneumonic plague can spread via respiratory droplets.
Symptoms	Fever, painful swollen lymph nodes, weakness; pneumonia in pneumonic disease.
PRECAUTIONS	Avoid infected animals/fleas, rodent control and rapid medical treatment.

29. Ebola Disease

Category	Infectious
Meaning	A severe viral disease that can cause systemic illness and bleeding.
CAUSE	Ebolaviruses.
Transmission / Spread	Direct contact with infected body fluids; risk increases during caregiving/funerals.
Symptoms	Fever, weakness, vomiting, diarrhoea and sometimes bleeding.
PRECAUTIONS	Avoid contact with body fluids, infection-control precautions and outbreak vaccination when applicable.

30. Marburg Virus Disease

Category	Infectious
Meaning	A severe viral hemorrhagic fever.
CAUSE	Marburg virus.
Transmission / Spread	Body-fluid contact; initial animal exposure can involve bats.
Symptoms	Fever, severe weakness, diarrhoea, vomiting and possible bleeding.
PRECAUTIONS	Avoid body-fluid exposure and follow outbreak infection-control measures.

31. Hepatitis A

Category	Infectious
Meaning	An acute viral infection of the liver that usually does not become chronic.
CAUSE	Hepatitis A virus.
Transmission / Spread	Fecal-oral route.
Symptoms	Fatigue, nausea, abdominal discomfort, dark urine and jaundice.
PRECAUTIONS	Safe water/food, handwashing and vaccination where recommended.

32. Hepatitis E

Category	Infectious
Meaning	An acute viral liver infection that can be severe in some pregnant people.
CAUSE	Hepatitis E virus.
Transmission / Spread	Usually fecal-oral, especially contaminated water.
Symptoms	Fever, nausea, abdominal pain, dark urine and jaundice.
PRECAUTIONS	Safe drinking water, sanitation and food hygiene.

33. HPV Infection

Category	Infectious
Meaning	A group of viral infections that can cause warts and several cancers.
CAUSE	Human papillomaviruses.
Transmission / Spread	Skin-to-skin/sexual contact.
Symptoms	Often no symptoms; some types cause warts or precancerous changes.
PRECAUTIONS	HPV vaccination, safer sex practices and recommended screening.

34. Candidiasis

Category	Infectious
Meaning	A fungal infection caused by overgrowth of Candida yeast.
CAUSE	Candida species, commonly <i>C. albicans</i> .
Transmission / Spread	Usually overgrowth of normal flora rather than ordinary person-to-person spread.
Symptoms	Itching, irritation and characteristic discharge depending on site.
PRECAUTIONS	Keep affected areas dry, manage risk factors and use appropriate medical treatment.

35. Ringworm

Category	Infectious
Meaning	A superficial fungal infection of skin, hair or nails.
CAUSE	Dermatophyte fungi.
Transmission / Spread	Direct contact or contaminated objects/animals.
Symptoms	Itchy, scaly ring-shaped skin lesions or nail changes.
PRECAUTIONS	Keep skin clean/dry, avoid sharing personal items and treat infected people/animals.

36. Scabies

Category	Parasitic
Meaning	A skin infestation caused by microscopic mites.
CAUSE	<i>Sarcoptes scabiei</i> .
Transmission / Spread	Prolonged skin-to-skin contact; sometimes bedding/clothing.
Symptoms	Intense itching, often worse at night, with burrows/rash.
PRECAUTIONS	Treat close contacts as advised, wash/handle bedding and clothing appropriately, avoid close contact until treated.

37. Ascariasis

Category	Parasitic
Meaning	A roundworm infection of the intestine.
CAUSE	<i>Ascaris lumbricoides</i> .
Transmission / Spread	Ingestion of eggs from contaminated soil/food.
Symptoms	Abdominal symptoms; heavy infection can cause intestinal obstruction.
PRECAUTIONS	Sanitation, handwashing, safe food/water and proper disposal of feces.

38. Schistosomiasis

Category	Parasitic
Meaning	A parasitic disease affecting blood vessels and organs after freshwater exposure.
CAUSE	Schistosoma parasites.
Transmission / Spread	Parasite larvae penetrate skin during contact with contaminated freshwater.
Symptoms	Rash, fever, abdominal/urinary symptoms and chronic organ damage.
PRECAUTIONS	Avoid unsafe freshwater exposure and improve sanitation and disease-control measures.

39. Filariasis

Category	Parasitic
Meaning	A group of mosquito-borne worm infections that can damage lymphatic tissues.
CAUSE	Filarial nematodes.
Transmission / Spread	Mosquito bites.
Symptoms	Often asymptomatic initially; chronic swelling can develop in limbs/genitals.
PRECAUTIONS	Mosquito protection and community preventive drug programs where recommended.

40. Asthma

Category	Respiratory
Meaning	A chronic airway disorder with variable narrowing and inflammation.
CAUSE	Multiple genetic and environmental factors; triggers vary.
Transmission / Spread	Not contagious.
Symptoms	Wheezing, cough, shortness of breath and chest tightness.
PRECAUTIONS	Avoid individual triggers, tobacco smoke and harmful air pollution; use prescribed inhalers correctly.

41. COPD

Category	Respiratory
Meaning	A chronic lung disease causing persistent airflow limitation.
CAUSE	Most commonly tobacco smoke; also air pollution and occupational exposures.
Transmission / Spread	Not contagious.
Symptoms	Chronic cough, phlegm, breathlessness and flare-ups.
PRECAUTIONS	Do not smoke, avoid second-hand smoke/pollution, reduce exposures and follow vaccination advice.

42. Lung Cancer

Category	Cancer
Meaning	A malignant growth arising in lung tissue.
CAUSE	Tobacco is the leading risk; radon and other exposures also contribute.
Transmission / Spread	Not contagious.
Symptoms	Persistent cough, chest pain, breathlessness, coughing blood or unexplained weight loss.
PRECAUTIONS	Do not smoke, avoid second-hand smoke and relevant occupational/environmental carcinogens.

43. Breast Cancer

Category	Cancer
Meaning	A malignant tumor arising from breast cells.
CAUSE	Complex genetic, hormonal and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Breast lump, skin/nipple changes or sometimes no early symptoms.
PRECAUTIONS	Know recommended screening, maintain healthy lifestyle and discuss high-risk genetics with clinicians.

44. Cervical Cancer

Category	Cancer
Meaning	Cancer of the cervix, usually related to persistent high-risk HPV infection.
CAUSE	Persistent oncogenic HPV infection is the main cause.
Transmission / Spread	HPV is sexually transmitted.
Symptoms	Often no early symptoms; later abnormal bleeding or discharge can occur.
PRECAUTIONS	HPV vaccination and cervical screening are key preventive measures.

45. Colorectal Cancer

Category	Cancer
Meaning	Cancer arising in the colon or rectum.
CAUSE	Multiple genetic, age, lifestyle and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Changes in bowel habits, blood in stool, abdominal symptoms or weight loss.
PRECAUTIONS	Recommended screening, healthy diet/activity, avoiding tobacco and limiting alcohol.

46. Prostate Cancer

Category	Cancer
Meaning	Malignant growth of prostate cells.
CAUSE	Age, family history and genetic factors contribute.
Transmission / Spread	Not contagious.
Symptoms	Often no early symptoms; urinary problems may occur later.
PRECAUTIONS	Discuss age/risk-appropriate screening and family history with a clinician.

47. Leukemia

Category	Cancer/Blood
Meaning	Cancer of blood-forming tissues producing abnormal blood cells.
CAUSE	Different genetic changes depending on leukemia type.
Transmission / Spread	Not contagious.
Symptoms	Fatigue, recurrent infections, fever, bruising/bleeding and bone pain.
PRECAUTIONS	No general guaranteed prevention; reduce known exposures and seek evaluation of persistent symptoms.

48. Lymphoma

Category	Cancer/Blood
Meaning	Cancer of lymphocytes, a type of immune cell.
CAUSE	Genetic changes; risk varies by lymphoma type.
Transmission / Spread	Not contagious.
Symptoms	Painless lymph-node swelling, fever, night sweats, weight loss and fatigue.
PRECAUTIONS	No universal prevention; avoid known carcinogenic exposures and seek evaluation of persistent lymph-node changes.

49. Melanoma

Category	Cancer/Skin
Meaning	A malignant tumor of pigment-producing melanocytes.
CAUSE	UV radiation is a major risk factor; genetics also contribute.
Transmission / Spread	Not contagious.
Symptoms	Changing mole, asymmetry, irregular border, varied color or growth.
PRECAUTIONS	Sun protection, avoid tanning beds and monitor changing skin lesions.

50. Type 1 Diabetes

Category	Endocrine/Metabolic
Meaning	An autoimmune disease in which pancreatic beta cells are destroyed, causing insulin deficiency.
CAUSE	Autoimmune and genetic/environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Thirst, frequent urination, weight loss, fatigue and possible ketoacidosis.
PRECAUTIONS	No established way to prevent most cases; recognize symptoms early and follow prescribed insulin care.

51. Type 2 Diabetes

Category	Endocrine/Metabolic
Meaning	A disorder involving insulin resistance and inadequate insulin production.
CAUSE	Genetic, metabolic and lifestyle factors.
Transmission / Spread	Not contagious.
Symptoms	Often gradual or absent symptoms; thirst, urination, fatigue and blurred vision.
PRECAUTIONS	Healthy diet, physical activity, healthy weight and avoiding tobacco can reduce risk.

52. Hypothyroidism

Category	Endocrine
Meaning	A condition in which the thyroid does not produce enough thyroid hormones.
CAUSE	Autoimmune disease, thyroid damage, iodine imbalance or certain medicines.
Transmission / Spread	Not contagious.
Symptoms	Fatigue, cold intolerance, weight gain, dry skin and constipation.
PRECAUTIONS	Adequate but not excessive iodine; regular follow-up when thyroid disease is diagnosed.

53. Hyperthyroidism

Category	Endocrine
Meaning	A condition in which the thyroid produces excessive thyroid hormone.
CAUSE	Graves disease, thyroid nodules or thyroid inflammation.
Transmission / Spread	Not contagious.
Symptoms	Weight loss, rapid heartbeat, heat intolerance, tremor and anxiety.
PRECAUTIONS	Medical evaluation and treatment; avoid excessive iodine supplementation unless advised.

54. Cushing Syndrome

Category	Endocrine
Meaning	A disorder caused by prolonged excessive exposure to cortisol.
CAUSE	Long-term corticosteroids or cortisol-producing tumors.
Transmission / Spread	Not contagious.
Symptoms	Weight gain, easy bruising, muscle weakness, high blood pressure and skin changes.
PRECAUTIONS	Use corticosteroids only as prescribed and taper only under medical supervision.

55. Polycystic Ovary Syndrome

Category	Endocrine/Reproductive
Meaning	A common hormonal disorder involving ovulatory dysfunction and androgen excess.
CAUSE	Complex genetic and metabolic factors.
Transmission / Spread	Not contagious.
Symptoms	Irregular periods, acne, excess hair growth and sometimes fertility problems.
PRECAUTIONS	Healthy lifestyle, weight management when appropriate and regular medical care.

56. Obesity

Category	Metabolic
Meaning	Excess body fat that can impair health and increase disease risk.
CAUSE	Energy imbalance influenced by biology, environment, behavior, medicines and social factors.
Transmission / Spread	Not contagious.
Symptoms	Often no specific symptoms; increased risk of metabolic and cardiovascular disease.
PRECAUTIONS	Balanced nutrition, regular activity, sleep and evidence-based medical support.

57. Hypertension

Category	Cardiovascular
Meaning	Persistently elevated blood pressure that increases cardiovascular and kidney risk.
CAUSE	Often multifactorial; genetics, diet, obesity, inactivity and age contribute.
Transmission / Spread	Not contagious.
Symptoms	Usually no symptoms; severe elevation can cause headache, chest symptoms or neurological problems.
PRECAUTIONS	Measure blood pressure, reduce excess salt, exercise, maintain healthy weight and avoid tobacco.

58. Coronary Artery Disease

Category	Cardiovascular
Meaning	Narrowing of heart arteries that reduces blood flow to heart muscle.
CAUSE	Atherosclerosis driven by cholesterol and other risk factors.
Transmission / Spread	Not contagious.
Symptoms	Chest pressure with exertion, breathlessness or sometimes no symptoms until a heart attack.
PRECAUTIONS	Do not smoke, control blood pressure/cholesterol/diabetes, exercise and follow prescribed prevention.

59. Heart Attack

Category	Cardiovascular Emergency
Meaning	Acute injury to heart muscle caused by sudden loss of coronary blood flow.
CAUSE	Usually rupture of an atherosclerotic plaque with clot formation.
Transmission / Spread	Not contagious.
Symptoms	Chest pressure/pain, sweating, nausea, breathlessness and pain radiating to arm/jaw/back.
PRECAUTIONS	Control cardiovascular risks and seek emergency care immediately for suspected symptoms.

60. Heart Failure

Category	Cardiovascular
Meaning	A condition in which the heart cannot pump or fill adequately to meet the body's needs.
CAUSE	Coronary disease, hypertension, valve disease, cardiomyopathy and other conditions.
Transmission / Spread	Not contagious.
Symptoms	Breathlessness, fatigue, leg swelling and reduced exercise tolerance.
PRECAUTIONS	Control blood pressure and diabetes, avoid tobacco and take prescribed medicines.

61. Stroke

Category	Neurological Emergency
Meaning	Brain injury caused by blocked blood flow or bleeding.
CAUSE	Ischaemic clot/artery blockage or hemorrhage; hypertension is a major risk factor.
Transmission / Spread	Not contagious.
Symptoms	Sudden weakness, facial droop, speech difficulty, vision problems or loss of balance.
PRECAUTIONS	Control blood pressure, diabetes and cholesterol; avoid tobacco; seek emergency care immediately.

62. Epilepsy

Category	Neurological
Meaning	A neurological disorder characterized by recurrent unprovoked seizures.
CAUSE	Genetic, structural, infectious, metabolic or unknown causes.
Transmission / Spread	Not contagious.
Symptoms	Seizures may cause altered awareness, movements, sensory symptoms or loss of consciousness.
PRECAUTIONS	Take prescribed medicines consistently, sleep adequately and avoid known seizure triggers.

63. Migraine

Category	Neurological
Meaning	A recurrent neurological disorder causing headache attacks with characteristic features.
CAUSE	Genetic and neurological factors; triggers vary.
Transmission / Spread	Not contagious.
Symptoms	Throbbing headache, nausea, light/sound sensitivity and sometimes aura.
PRECAUTIONS	Regular sleep/meals, hydration, trigger management and prescribed preventive treatment when needed.

64. Parkinson Disease

Category	Neurological
Meaning	A progressive neurological disorder affecting movement and other functions.
CAUSE	Complex interaction of genetic and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Slowness, tremor, stiffness, balance problems and non-motor symptoms.
PRECAUTIONS	No guaranteed prevention; regular exercise and specialist care can support function.

65. Alzheimer Disease

Category	Neurological
Meaning	A progressive brain disorder and common cause of dementia.
CAUSE	Complex genetic, protein and age-related mechanisms.
Transmission / Spread	Not contagious.
Symptoms	Progressive memory and thinking impairment, followed by loss of daily function.
PRECAUTIONS	Manage vascular risks, exercise, avoid tobacco and maintain cognitive/social activity.

66. Multiple Sclerosis

Category	Neurological/Autoimmune
Meaning	An immune-mediated disease in which the nervous system's myelin and other structures are damaged.
CAUSE	Immune, genetic and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Vision problems, weakness, numbness, imbalance and fatigue; symptoms vary.
PRECAUTIONS	No guaranteed prevention; early specialist care and disease-modifying treatment can reduce activity.

67. Meningioma

Category	Neurological Tumor
Meaning	A tumor arising from the membranes surrounding the brain or spinal cord.
CAUSE	Often sporadic genetic changes; some risk factors are known.
Transmission / Spread	Not contagious.
Symptoms	Headache, seizures, weakness or no symptoms depending on location.
PRECAUTIONS	No general prevention; medical evaluation of persistent neurological symptoms.

68. Chronic Kidney Disease

Category	Kidney
Meaning	Long-term kidney damage or reduced kidney function.
CAUSE	Common causes include diabetes and hypertension; many other causes exist.
Transmission / Spread	Not contagious.
Symptoms	Often silent early; later swelling, fatigue, urinary changes, nausea or itching.
PRECAUTIONS	Control blood pressure/diabetes, avoid unnecessary kidney-toxic medicines and maintain healthy habits.

69. Kidney Stones

Category	Kidney/Urinary
Meaning	Hard mineral deposits formed in the urinary tract.
CAUSE	Concentrated urine, mineral imbalance, diet, genetics and some diseases.
Transmission / Spread	Not contagious.
Symptoms	Severe flank pain, blood in urine, nausea and urinary symptoms.
PRECAUTIONS	Adequate fluid intake, dietary measures based on stone type and medical evaluation for recurrent stones.

70. Urinary Tract Infection

Category	Urinary/Infectious
Meaning	Infection of the bladder, urethra or other urinary tract structures.
CAUSE	Usually bacteria, commonly E. coli.
Transmission / Spread	Usually not contagious.
Symptoms	Burning urination, frequency, urgency and sometimes fever/flank pain.
PRECAUTIONS	Hydration, good hygiene and medical evaluation for recurrent or complicated infections.

71. Benign Prostatic Hyperplasia

Category	Urologic
Meaning	Non-cancerous enlargement of the prostate that can obstruct urine flow.
CAUSE	Age-related hormonal/tissue changes.
Transmission / Spread	Not contagious.
Symptoms	Weak stream, difficulty starting, frequency and nighttime urination.
PRECAUTIONS	Medical assessment of urinary symptoms and review of medicines/risk factors.

72. Gastritis

Category	Digestive
Meaning	Inflammation of the stomach lining.
CAUSE	H. pylori infection, NSAIDs, alcohol and other causes.
Transmission / Spread	H. pylori can spread between people, but gastritis itself is not generally contagious.
Symptoms	Upper abdominal discomfort, nausea and indigestion; may cause bleeding.
PRECAUTIONS	Avoid unnecessary NSAIDs/alcohol, test/treat H. pylori when appropriate and seek care for bleeding.

73. Peptic Ulcer Disease

Category	Digestive
Meaning	An ulcer in the stomach or duodenal lining.
CAUSE	H. pylori infection or NSAID use are major causes.
Transmission / Spread	H. pylori can spread; ulcer disease itself is not directly contagious.
Symptoms	Burning upper-abdominal pain, nausea, bleeding or anemia.
PRECAUTIONS	Treat H. pylori, avoid unnecessary NSAIDs and smoking, and seek urgent care for bleeding.

74. GERD

Category	Digestive
Meaning	Repeated backflow of stomach contents into the esophagus causing symptoms or injury.
CAUSE	Weak lower esophageal barrier and contributing factors such as obesity or certain foods/medicines.
Transmission / Spread	Not contagious.
Symptoms	Heartburn, regurgitation, chest discomfort or cough.
PRECAUTIONS	Healthy weight when appropriate, avoid individual triggers and follow medical treatment.

75. Celiac Disease

Category	Digestive/Autoimmune
Meaning	An immune reaction to gluten that damages the small intestine.
CAUSE	Genetic susceptibility plus gluten exposure.
Transmission / Spread	Not contagious.
Symptoms	Diarrhoea, bloating, weight loss, anemia or fatigue; symptoms vary.
PRECAUTIONS	Strict lifelong gluten-free diet after proper diagnosis and medical/dietetic guidance.

76. Crohn Disease

Category	Digestive/Inflammatory
Meaning	A chronic inflammatory bowel disease that can affect any part of the digestive tract.
CAUSE	Immune, genetic and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Abdominal pain, diarrhoea, weight loss and fatigue.
PRECAUTIONS	No universal prevention; avoid smoking and maintain specialist care.

77. Ulcerative Colitis

Category	Digestive/Inflammatory
Meaning	A chronic inflammatory disease of the colon and rectum.
CAUSE	Immune, genetic and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Bloody diarrhoea, urgency, abdominal pain and fatigue.
PRECAUTIONS	No universal prevention; specialist treatment and avoiding smoking-related risks.

78. Appendicitis

Category	Digestive Emergency
Meaning	Inflammation of the appendix that can rupture if untreated.
CAUSE	Usually blockage of the appendix followed by inflammation/infection.
Transmission / Spread	Not contagious.
Symptoms	Pain often moving to the lower right abdomen, nausea, fever and loss of appetite.
PRECAUTIONS	No reliable home prevention; urgent evaluation for severe or worsening abdominal pain.

79. Gallstones

Category	Digestive
Meaning	Solid deposits that form in the gallbladder.
CAUSE	Imbalance in bile components and gallbladder stasis; risks include obesity and rapid weight loss.
Transmission / Spread	Not contagious.
Symptoms	May cause episodic right-upper-abdominal pain, nausea or complications.
PRECAUTIONS	Healthy weight management, balanced diet and medical assessment of recurrent pain.

80. Pancreatitis

Category	Digestive
Meaning	Inflammation of the pancreas that can be acute or chronic.
CAUSE	Gallstones, alcohol and other causes including medications/metabolic disease.
Transmission / Spread	Not contagious.
Symptoms	Severe upper-abdominal pain, nausea and vomiting.
PRECAUTIONS	Limit harmful alcohol use, manage triglycerides and gallstone risk, and seek urgent care for severe pain.

81. Cirrhosis

Category	Liver
Meaning	Advanced scarring of the liver that disrupts liver function.
CAUSE	Chronic viral hepatitis, alcohol-associated disease, fatty liver disease and other causes.
Transmission / Spread	Not contagious, although some causes such as hepatitis viruses can spread.
Symptoms	Fatigue, jaundice, swelling, bruising and confusion in advanced disease.
PRECAUTIONS	Avoid harmful alcohol, prevent/treat viral hepatitis and manage metabolic risk factors.

82. Fatty Liver Disease

Category	Liver/Metabolic
Meaning	Excess fat accumulation in the liver, with or without inflammation and fibrosis.
CAUSE	Metabolic dysfunction, obesity, diabetes, alcohol and other factors.
Transmission / Spread	Not contagious.
Symptoms	Often no symptoms; fatigue or abnormal liver tests may occur.
PRECAUTIONS	Healthy weight, physical activity, balanced diet and avoiding harmful alcohol.

83. Iron-Deficiency Anemia

Category	Blood
Meaning	Anemia caused by insufficient iron for normal red blood-cell production.
CAUSE	Blood loss, inadequate intake, increased need or poor absorption.
Transmission / Spread	Not contagious.
Symptoms	Fatigue, weakness, pale skin, shortness of breath and sometimes pica.
PRECAUTIONS	Adequate dietary iron and investigation/treatment of the underlying cause of deficiency.

84. Sickle Cell Disease

Category	Blood/Genetic
Meaning	An inherited disorder causing abnormal hemoglobin and sickle-shaped red blood cells.
CAUSE	Inherited HBB gene variants.
Transmission / Spread	Not contagious.
Symptoms	Anemia, painful crises, fatigue and increased infection risk.
PRECAUTIONS	Genetic counseling, vaccination, hydration, avoiding known triggers and specialist preventive care.

85. Hemophilia

Category	Blood/Genetic
Meaning	An inherited bleeding disorder caused by deficiency of clotting factors.
CAUSE	Usually inherited factor VIII or IX deficiency.
Transmission / Spread	Not contagious.
Symptoms	Easy/prolonged bleeding and bleeding into joints or muscles.
PRECAUTIONS	Avoid unnecessary trauma/medicines that increase bleeding and follow clotting-factor treatment plans.

86. Thalassemia

Category	Blood/Genetic
Meaning	Inherited disorders causing reduced production of normal hemoglobin.
CAUSE	Inherited globin-gene variants.
Transmission / Spread	Not contagious.
Symptoms	Anemia, fatigue and in severe forms growth or organ complications.
PRECAUTIONS	Genetic counseling, specialist monitoring and appropriate transfusion/iron-chelation care.

87. Osteoporosis

Category	Musculoskeletal
Meaning	Loss of bone strength that increases fracture risk.
CAUSE	Aging, hormonal changes, nutrition, medicines and other conditions.
Transmission / Spread	Not contagious.
Symptoms	Usually silent until fracture; hip, spine and wrist are common sites.
PRECAUTIONS	Adequate calcium/vitamin D, weight-bearing activity, fall prevention and avoiding tobacco.

88. Osteoarthritis

Category	Musculoskeletal
Meaning	Degeneration and remodeling of joint tissues causing pain and stiffness.
CAUSE	Age, joint injury, obesity, genetics and mechanical factors.
Transmission / Spread	Not contagious.
Symptoms	Joint pain, stiffness and reduced movement.
PRECAUTIONS	Exercise, healthy weight, joint protection and appropriate physical therapy/medical care.

89. Rheumatoid Arthritis

Category	Autoimmune
Meaning	A systemic autoimmune disease that primarily inflames joints.
CAUSE	Autoimmune and genetic/environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Symmetrical joint pain/swelling, morning stiffness and fatigue.
PRECAUTIONS	No guaranteed prevention; avoid tobacco and seek early specialist treatment.

90. Gout

Category	Metabolic/Musculoskeletal
Meaning	Inflammatory arthritis caused by urate crystal deposition in joints.
CAUSE	High uric acid from metabolic/genetic factors, kidney function, diet and medicines.
Transmission / Spread	Not contagious.
Symptoms	Sudden severe joint pain, swelling and redness, often in the big toe.
PRECAUTIONS	Maintain healthy weight, limit alcohol and high-purine triggers as advised, and use prescribed urate-lowering treatment.

91. Psoriasis

Category	Skin/Autoimmune
Meaning	A chronic immune-mediated skin disease causing rapid skin-cell turnover.
CAUSE	Immune and genetic factors; triggers include stress, infections and some medicines.
Transmission / Spread	Not contagious.
Symptoms	Well-demarcated scaly plaques, itching and sometimes joint inflammation.
PRECAUTIONS	Moisturize, avoid known triggers, do not share misinformation about contagion, and use prescribed treatment.

92. Eczema/Atopic Dermatitis

Category	Skin
Meaning	A chronic itchy inflammatory skin condition associated with a weakened skin barrier.
CAUSE	Genetic, immune and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Dry itchy skin, rash and recurrent flares.
PRECAUTIONS	Moisturize regularly, avoid individual irritants and follow prescribed anti-inflammatory treatment.

93. Acne

Category	Skin
Meaning	A common inflammatory disorder of hair follicles and sebaceous glands.
CAUSE	Hormonal changes, sebum, follicular blockage and inflammation.
Transmission / Spread	Not contagious.
Symptoms	Blackheads, whiteheads, pimples and sometimes nodules/scars.
PRECAUTIONS	Gentle skin care, avoid picking, use appropriate non-comedogenic products and medical treatment when needed.

94. Vitiligo

Category	Skin/Autoimmune
Meaning	A disorder in which pigment-producing cells are lost, causing depigmented patches.
CAUSE	Autoimmune mechanisms plus genetic/environmental factors.
Transmission / Spread	Not contagious.
Symptoms	White patches of skin or hair; otherwise often asymptomatic.
PRECAUTIONS	Sun protection, skin care and specialist treatment when desired.

95. Conjunctivitis

Category	Eye
Meaning	Inflammation of the conjunctiva causing red or irritated eyes.
CAUSE	Viruses, bacteria, allergies or irritants.
Transmission / Spread	Some infectious forms spread through contact/respiratory secretions.
Symptoms	Red eyes, discharge, itching, watering and irritation.
PRECAUTIONS	Hand hygiene, avoid sharing towels/cosmetics and stay home when contagious according to local guidance.

96. Cataract

Category	Eye
Meaning	Clouding of the eye's natural lens that reduces vision.
CAUSE	Aging, diabetes, steroid exposure, trauma and other factors.
Transmission / Spread	Not contagious.
Symptoms	Blurred vision, glare and reduced night vision.
PRECAUTIONS	Protect eyes from UV/trauma, control diabetes and obtain eye examinations.

97. Glaucoma

Category	Eye
Meaning	A group of disorders causing optic-nerve damage, often associated with elevated eye pressure.
CAUSE	Multiple mechanisms including impaired fluid drainage.
Transmission / Spread	Not contagious.
Symptoms	Often silent early; peripheral vision loss can develop.
PRECAUTIONS	Regular eye examinations for at-risk people and adherence to prescribed pressure-lowering treatment.

98. Macular Degeneration

Category	Eye
Meaning	Damage to the macula causing central vision loss, usually in older adults.
CAUSE	Age-related degeneration with genetic and vascular factors.
Transmission / Spread	Not contagious.
Symptoms	Blurred/distorted central vision and difficulty recognizing faces or reading.
PRECAUTIONS	Do not smoke, maintain cardiovascular health and obtain recommended eye evaluations.

99. Diabetic Retinopathy

Category	Eye/Diabetes
Meaning	Damage to retinal blood vessels caused by prolonged diabetes.
CAUSE	Chronic high blood glucose and associated vascular risk.
Transmission / Spread	Not contagious.
Symptoms	Often silent early; later blurred vision, floaters or vision loss.
PRECAUTIONS	Control glucose, blood pressure and lipids and obtain regular retinal screening.

100. Depressive Disorder

Category	Mental Health
Meaning	A condition involving persistent low mood or loss of interest with associated cognitive and physical symptoms.
CAUSE	Multiple biological, psychological and social factors.
Transmission / Spread	Not contagious.
Symptoms	Persistent sadness, loss of interest, sleep/appetite changes, fatigue and concentration problems.
PRECAUTIONS	Seek professional support, maintain social connection and healthy routines; urgent help is needed for self-harm thoughts.

101. Generalized Anxiety Disorder

Category	Mental Health
Meaning	A disorder involving excessive, persistent worry that is difficult to control.
CAUSE	Biological, psychological and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Excessive worry, restlessness, tension, sleep and concentration problems.
PRECAUTIONS	Regular sleep/activity, stress management and professional assessment/treatment when persistent.

102. Bipolar Disorder

Category	Mental Health
Meaning	A disorder characterized by episodes of depression and episodes of mania or hypomania.
CAUSE	Genetic, neurobiological and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Mood episodes with changes in energy, sleep, activity, judgment and depression.
PRECAUTIONS	Regular specialist care, prescribed medication adherence, sleep regularity and early attention to mood changes.

103. Schizophrenia

Category	Mental Health
Meaning	A serious mental disorder involving disturbances in perception, thinking, emotion and behavior.
CAUSE	Complex genetic, brain-developmental and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Delusions, hallucinations, disorganized thinking and reduced motivation/social functioning.
PRECAUTIONS	Early professional care, medication when prescribed, psychosocial support and avoidance of harmful substances.

104. Obsessive-Compulsive Disorder

Category	Mental Health
Meaning	A disorder involving intrusive unwanted thoughts and/or repetitive behaviors performed to reduce distress.
CAUSE	Complex genetic, brain and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Obsessions, compulsions and significant distress or interference with daily life.
PRECAUTIONS	Evidence-based psychological treatment and prescribed medication can help; avoid reinforcing compulsions.

105. Post-Traumatic Stress Disorder

Category	Mental Health
Meaning	A condition that can develop after exposure to traumatic events.
CAUSE	Trauma plus individual biological and psychological factors.
Transmission / Spread	Not contagious.
Symptoms	Intrusive memories, avoidance, hyperarousal, negative mood/cognition changes.
PRECAUTIONS	Trauma-informed professional treatment, social support and healthy routines.

106. Autism Spectrum Disorder

Category	Neurodevelopmental
Meaning	A neurodevelopmental condition involving differences in social communication and restricted/repetitive patterns of behavior or interests.
CAUSE	Strong genetic contribution with multiple developmental factors.
Transmission / Spread	Not contagious.
Symptoms	Differences in communication/social interaction and sensory or repetitive behaviors; presentation varies widely.
PRECAUTIONS	No disease prevention is established; provide early developmental support and individualized accommodations.

107. ADHD

Category	Neurodevelopmental
Meaning	A neurodevelopmental disorder involving persistent inattention and/or hyperactivity-impulsivity.
CAUSE	Strong genetic contribution with developmental and environmental influences.
Transmission / Spread	Not contagious.
Symptoms	Inattention, impulsivity, hyperactivity and executive-function difficulties.
PRECAUTIONS	Structured routines, behavioral strategies, educational support and clinical treatment when appropriate.

108. Autism-Related Epilepsy

Category	Neurological
Meaning	Seizure disorders that can co-occur with neurodevelopmental conditions; not a single disease entity.
CAUSE	Multiple genetic/neurological causes.
Transmission / Spread	Not contagious.
Symptoms	Seizures or episodes of altered awareness depending on seizure type.
PRECAUTIONS	Medical evaluation of suspected seizures and adherence to prescribed seizure management.

109. Endometriosis

Category	Gynecological
Meaning	A chronic condition in which tissue resembling endometrium grows outside the uterus.
CAUSE	Exact cause is multifactorial and not fully established.
Transmission / Spread	Not contagious.
Symptoms	Pelvic pain, painful periods, painful sex and sometimes infertility.

PRECAUTIONS	No guaranteed prevention; seek assessment for severe menstrual/pelvic pain and follow individualized treatment.
--------------------	---

110. Uterine Fibroids

Category	Gynecological
Meaning	Benign tumors of uterine muscle that can cause bleeding or pressure symptoms.
CAUSE	Hormonal and genetic factors.
Transmission / Spread	Not contagious.
Symptoms	Heavy menstrual bleeding, pelvic pressure, pain or urinary symptoms.
PRECAUTIONS	Regular medical assessment of heavy bleeding; treatment depends on symptoms and fertility goals.

111. Endometrial Cancer

Category	Cancer/Gynecological
Meaning	Cancer arising from the lining of the uterus.
CAUSE	Risk is associated with prolonged estrogen exposure, obesity, age and some genetic syndromes.
Transmission / Spread	Not contagious.
Symptoms	Abnormal vaginal bleeding, especially after menopause.
PRECAUTIONS	Report abnormal bleeding promptly; manage obesity/metabolic risks and follow high-risk surveillance.

112. Ovarian Cancer

Category	Cancer/Gynecological
Meaning	Cancer arising from ovarian or related tissues.
CAUSE	Age, genetics and family history are important factors.
Transmission / Spread	Not contagious.
Symptoms	Bloating, pelvic/abdominal pain, early fullness and urinary changes.
PRECAUTIONS	Know family history/genetic risk and seek evaluation for persistent symptoms.

113. Erectile Dysfunction

Category	Sexual Health
Meaning	Persistent difficulty achieving or maintaining an erection sufficient for sexual activity.
CAUSE	Vascular, neurological, hormonal, medication and psychological factors.
Transmission / Spread	Not contagious.
Symptoms	Difficulty obtaining or maintaining erections.
PRECAUTIONS	Control cardiovascular risks, avoid tobacco, exercise and seek medical evaluation for persistent symptoms.

114. Infertility

Category	Reproductive
Meaning	Failure to achieve pregnancy after an appropriate period of regular unprotected intercourse.
CAUSE	Male, female, combined or unexplained causes including ovulatory, tubal, sperm and age-related factors.
Transmission / Spread	Not contagious.
Symptoms	Usually no symptoms beyond inability to conceive.
PRECAUTIONS	Preconception health, STI prevention/treatment, avoiding tobacco and timely fertility evaluation.

115. Premature Birth

Category	Pregnancy
Meaning	Birth occurring before 37 completed weeks of pregnancy.
CAUSE	Many possible causes including infection, multiple pregnancy, placental problems and maternal conditions.
Transmission / Spread	Not contagious.
Symptoms	Labor symptoms vary; newborn may have breathing, feeding or temperature problems.
PRECAUTIONS	Prenatal care, treatment of maternal conditions and avoidance of tobacco/alcohol; risk assessment is individualized.

116. Preeclampsia

Category	Pregnancy
Meaning	A pregnancy complication involving high blood pressure and organ dysfunction after 20 weeks.
CAUSE	Exact mechanism is complex and placenta-related.
Transmission / Spread	Not contagious.
Symptoms	High blood pressure, headache, visual symptoms, swelling or upper-abdominal pain; may be silent.
PRECAUTIONS	Regular prenatal blood-pressure monitoring and urgent evaluation of warning symptoms.

117. Ectopic Pregnancy

Category	Pregnancy Emergency
Meaning	Pregnancy implanted outside the main uterine cavity, usually in a fallopian tube.
CAUSE	Prior ectopic pregnancy, tubal disease, some fertility treatments and other factors.
Transmission / Spread	Not contagious.
Symptoms	Pelvic/abdominal pain, vaginal bleeding, dizziness or shoulder pain if rupture occurs.

PRECAUTIONS	Early pregnancy evaluation when symptoms/risk factors are present; emergency care for severe pain/fainting.
--------------------	---

118. Neonatal Sepsis

Category	Infectious/Emergency
Meaning	A severe infection in a newborn that can cause organ dysfunction.
CAUSE	Bacteria or other pathogens acquired before, during or after birth.
Transmission / Spread	Depends on pathogen; may involve maternal or healthcare-associated transmission.
Symptoms	Poor feeding, temperature instability, lethargy, breathing problems or seizures.
PRECAUTIONS	Maternal prenatal care, infection prevention, clean delivery/neonatal care and rapid assessment of sick newborns.

119. Down Syndrome

Category	Genetic
Meaning	A chromosomal condition caused by an extra copy of chromosome 21.
CAUSE	Usually trisomy 21; sometimes translocation or mosaicism.
Transmission / Spread	Not contagious.
Symptoms	Characteristic physical features and variable developmental/medical differences.
PRECAUTIONS	No behavioral prevention; prenatal screening/diagnostic options and appropriate lifelong healthcare support.

120. Cystic Fibrosis

Category	Genetic
Meaning	An inherited disorder affecting ion and water transport, causing thick secretions in lungs and other organs.
CAUSE	Pathogenic variants in the CFTR gene.
Transmission / Spread	Not contagious.
Symptoms	Chronic cough, recurrent lung infections, digestive problems and poor growth.
PRECAUTIONS	Genetic counseling, newborn screening and specialist care.

121. Huntington Disease

Category	Genetic/Neurological
Meaning	An inherited progressive neurodegenerative disorder affecting movement, cognition and behavior.
CAUSE	Pathogenic expansion in the HTT gene.
Transmission / Spread	Not contagious; inherited in an autosomal-dominant pattern.
Symptoms	Involuntary movements, cognitive decline and psychiatric symptoms.
PRECAUTIONS	Genetic counseling and specialist supportive care; no established way to prevent disease in a carrier.

122. Hemochromatosis

Category	Genetic/Metabolic
Meaning	A disorder causing excessive iron absorption and iron accumulation in tissues.
CAUSE	Inherited or acquired causes; HFE variants are common in hereditary forms.
Transmission / Spread	Not contagious.
Symptoms	Fatigue, joint pain, liver disease, diabetes or skin pigmentation changes.
PRECAUTIONS	Genetic/clinical evaluation when indicated; early detection and therapeutic iron removal can prevent complications.

123. Amyotrophic Lateral Sclerosis

Category	Neurological
Meaning	A progressive disease causing degeneration of motor neurons and loss of muscle control.
CAUSE	Mostly sporadic; a minority is inherited.
Transmission / Spread	Not contagious.
Symptoms	Progressive weakness, muscle twitching, speech/swallowing and breathing difficulties.
PRECAUTIONS	No proven general prevention; multidisciplinary neurological care and respiratory/nutritional support.

124. Myasthenia Gravis

Category	Autoimmune/Neurological
Meaning	An autoimmune disorder impairing communication between nerves and muscles.
CAUSE	Autoantibodies against neuromuscular-junction proteins.
Transmission / Spread	Not contagious.
Symptoms	Fluctuating muscle weakness, drooping eyelids, double vision and swallowing problems.
PRECAUTIONS	Avoid known triggers/medicines, follow treatment and seek emergency care for breathing difficulty.

125. Bell Palsy

Category	Neurological
Meaning	Acute weakness or paralysis of one side of the face.
CAUSE	Often associated with inflammation of the facial nerve; triggers may include viral reactivation.
Transmission / Spread	Not generally contagious.
Symptoms	Sudden one-sided facial weakness, altered taste and difficulty closing an eye.
PRECAUTIONS	Prompt medical assessment to exclude stroke; protect the affected eye and follow treatment advice.

126. Vertigo

Category	Neurological/ENT
Meaning	A sensation that you or the environment is spinning or moving.
CAUSE	Many causes, including inner-ear disorders and neurological conditions.
Transmission / Spread	Not contagious.
Symptoms	Spinning sensation, nausea, imbalance and sometimes hearing symptoms.
PRECAUTIONS	Avoid driving during attacks and seek evaluation for new severe vertigo or neurological symptoms.

127. Otitis Media

Category	Ear
Meaning	Infection/inflammation of the middle ear, common in children.
CAUSE	Often follows viral upper-respiratory infection; bacteria may contribute.
Transmission / Spread	Underlying respiratory infections can spread, but the ear infection itself is not usually directly contagious.
Symptoms	Ear pain, fever, irritability and sometimes reduced hearing.
PRECAUTIONS	Vaccination, smoke-free environment, hand hygiene and medical assessment when symptoms are severe/persistent.

128. Hearing Loss

Category	Ear
Meaning	Reduced ability to hear sounds adequately.
CAUSE	Aging, noise exposure, infections, genetics, medicines and other causes.
Transmission / Spread	Not contagious in most forms.
Symptoms	Difficulty understanding speech, especially in noise; tinnitus may occur.
PRECAUTIONS	Hearing protection, avoid excessive noise, treat ear infections and obtain hearing checks.

129. Sinusitis

Category	Respiratory/ENT
Meaning	Inflammation of the sinuses, often after a respiratory infection.
CAUSE	Viruses, bacteria, allergies or structural factors.
Transmission / Spread	Some infectious causes can spread as the underlying respiratory infection.
Symptoms	Facial pressure, nasal congestion/discharge, reduced smell and headache.
PRECAUTIONS	Hand hygiene, allergy control and medical evaluation for severe or persistent symptoms.

130. Allergic Rhinitis

Category	Allergic/Respiratory
Meaning	An allergic inflammation of the nasal passages.
CAUSE	Immune response to allergens such as pollen, dust mites or animal dander.
Transmission / Spread	Not contagious.
Symptoms	Sneezing, runny/blocked nose, itchy eyes and throat.
PRECAUTIONS	Reduce allergen exposure, improve indoor environment and use prescribed allergy treatment.

131. Tuberculosis Meningitis

Category	Infectious/Neurological
Meaning	Tuberculosis infection involving the membranes around the brain.
CAUSE	Mycobacterium tuberculosis.
Transmission / Spread	Underlying TB spreads through air; meningitis itself is not spread by ordinary contact.
Symptoms	Headache, fever, vomiting, confusion and neurological symptoms.
PRECAUTIONS	Prevent TB transmission, recognize symptoms early and complete TB treatment.

132. Rheumatic Heart Disease

Category	Cardiovascular/Inflammatory
Meaning	Permanent heart-valve damage following repeated or severe rheumatic fever.
CAUSE	Immune response after group A streptococcal infection.
Transmission / Spread	Strep throat can spread; heart disease itself is not contagious.
Symptoms	Breathlessness, fatigue, palpitations and heart murmurs depending on valve damage.
PRECAUTIONS	Prompt treatment of appropriate streptococcal throat infections and secondary prophylaxis for people with rheumatic fever.

133. Peripheral Artery Disease

Category	Cardiovascular
Meaning	Reduced blood flow to limbs due to narrowed arteries.
CAUSE	Atherosclerosis; smoking and diabetes are major risks.
Transmission / Spread	Not contagious.
Symptoms	Leg pain with walking, cold feet, slow-healing wounds or no symptoms.
PRECAUTIONS	Do not smoke, exercise, control diabetes/cholesterol/blood pressure and follow vascular care.

134. Atrial Fibrillation

Category	Cardiovascular
Meaning	An irregular, often rapid heart rhythm arising from the atria.
CAUSE	Age, hypertension, heart disease, thyroid disease, alcohol and other factors.
Transmission / Spread	Not contagious.
Symptoms	Palpitations, fatigue, breathlessness or no symptoms.
PRECAUTIONS	Control blood pressure and other risks, limit harmful alcohol and follow treatment to reduce stroke risk.

135. Deep Vein Thrombosis

Category	Vascular Emergency
Meaning	A blood clot in a deep vein, usually in a leg.
CAUSE	Immobility, surgery, cancer, hormones, inherited clotting risk and other factors.
Transmission / Spread	Not contagious.
Symptoms	Leg swelling, pain, warmth or sometimes no symptoms.
PRECAUTIONS	Move regularly during long travel, follow postoperative prevention and manage individual clotting risks.

136. Pulmonary Embolism

Category	Vascular Emergency
Meaning	A blood clot that travels to the lungs and obstructs blood flow.
CAUSE	Usually embolization of a deep-vein clot.
Transmission / Spread	Not contagious.
Symptoms	Sudden breathlessness, chest pain, rapid heart rate, coughing blood or collapse.
PRECAUTIONS	Prevent and treat DVT risk, follow prescribed anticoagulation and seek emergency care for symptoms.

137. Sepsis

Category	Medical Emergency
Meaning	Life-threatening organ dysfunction caused by a dysregulated response to infection.
CAUSE	Severe bacterial, viral, fungal or parasitic infections.
Transmission / Spread	The underlying infection may be contagious; sepsis itself is not.
Symptoms	Fever or low temperature, confusion, rapid breathing, low blood pressure and severe weakness.
PRECAUTIONS	Prevent infections with vaccination/hygiene, treat infections appropriately and seek urgent care for deterioration.

138. Anaphylaxis

Category	Allergic Emergency
Meaning	A rapid, potentially fatal systemic allergic reaction.
CAUSE	Foods, medicines, insect venom and other allergens.
Transmission / Spread	Not contagious.
Symptoms	Breathing difficulty, throat swelling, hives, vomiting, dizziness or collapse.
PRECAUTIONS	Avoid known allergens, carry prescribed epinephrine and use it immediately for severe reactions while seeking emergency care.

139. Systemic Lupus Erythematosus

Category	Autoimmune
Meaning	A systemic autoimmune disease that can affect skin, joints, kidneys, blood and other organs.
CAUSE	Immune dysregulation with genetic/environmental influences.
Transmission / Spread	Not contagious.
Symptoms	Fatigue, joint pain, rashes and variable organ involvement.
PRECAUTIONS	Sun protection, avoid smoking and maintain specialist follow-up.

140. Eczema

Category	Skin
Meaning	A chronic inflammatory skin condition causing itching and barrier dysfunction.
CAUSE	Genetic, immune and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Dry itchy rash and recurrent flares.
PRECAUTIONS	Regular moisturization, avoid irritants and follow treatment plans.

141. OCD

Category	Mental Health
Meaning	A disorder with intrusive unwanted thoughts and repetitive behaviors or mental acts.
CAUSE	Genetic, brain and environmental factors.
Transmission / Spread	Not contagious.
Symptoms	Obsessions, compulsions and significant distress/interference.
PRECAUTIONS	Evidence-based therapy and medication when indicated; avoid reinforcing compulsions.

142. PTSD

Category	Mental Health
Meaning	A trauma-related disorder involving persistent re-experiencing, avoidance and arousal changes.
CAUSE	Traumatic exposure plus biological/psychological factors.
Transmission / Spread	Not contagious.
Symptoms	Intrusive memories, nightmares, avoidance and hyperarousal.
PRECAUTIONS	Trauma-informed professional treatment and social support.

RAG Usage Notes

Recommended fields: **name, category, meaning, cause, transmission, symptoms, precautions**. Use one disease as one document/chunk for broad retrieval, or split fields into child chunks for field-specific questions. Keep the original disease name as metadata and add aliases separately when available.

Source framework: World Health Organization ICD-11. WHO states that the Foundation Component represents the broader WHO-FIC universe of interconnected entities and synonyms, including diseases, disorders, injuries, external causes, signs and symptoms, functional descriptions, interventions and extension codes. ICD-11 2026-01 is the latest release.
